Best User Patches Librairy

for the fun, no prized.

rules:

Publish here your Patches Librairy for the MIDIbox FM and SID based Synths.

Sounding great and well documented. For the SIDs librairies, it’s better if your do a version for each config (1,2,3 or 4 SIDs and different chips versions).

Bittersweet Synth - MBSID v2 Patches by 0xFFender. Incl. Square and Saw versions. 3channel MONO synth w/ different portamento speed values. Hope you like it. Get it here http://www.midibox.org/dokuwiki/lib/exe/fetch.php?media=bittersweet.zip. I used a 6581, but no filters/mixed waves are used, so using 8580/6582A will be fine. Note this is MONO and the 'right' SID conencted will always play a simple detuned sound and not sweep like the 'left' SID does.
