!!!Reason Reason is a popular real-time sound synthesis and Sampling software program developed by Swedish software developers Propellerhead Software. It emulates a rack of hardware [synthesizers|synthersizer], [samplers|sampler], signal processors, [sequencers|sequencer] and [mixers|mixer]. It can be used alone, or as a sub-system with [music sequencer] software. Reason 1.0 was released in November 2000. The current version of Reason is 2.5, and this newest version has several added effects and instruments to the Reason studio.

Use [MIDIbox64], [MIDIbox64E] or [MIDIO128]

Configuration: please describe it here:
