

SD Card Module

Introduction

SD Card Could be interfaced with Core board for Data Storage / Reading . It replaces [Bankstick](#).

Interconnection

Direct Connections are only possible with MBHP_CORE_STM32 (3.3V IO)
PIC based MBHP_CORE (5.0V IO) requires additional resistors (voltage dividers)
and a 3.3V Voltage Regulator

MIDIbox Hardware Platform
MBHP_SDCARD
(C) T. Klose 2009-02-24

STM32 Specific

The resistor array R30 of the MBHP_CORE_STM32 module shouldn't be connected when a SD Card is used, because pads are configured in Push-Pull mode at 3.3V. SD Card transfers could work unstable with these Pull-Up resistors!
