## Dual SSM 2044 PCB Bulk Order

2025/08/22 03:21

This page is about Seppoman's bulk order for the ssm2044\_pcb.

More information and sound demos can be found here and here.

**Warning:** This is not a suitable project for absolute beginners. The soldering isn't very difficult, but you will need either an AOUT\_NG (SMT soldering required), an AOUT module (which needs to be expanded with the bipolar option) or two (!) AOUT\_LC modules, or another type of CV source to control this module, in addition to the actual synth (SID/FM) you want to use it with. So a bit of soldering experience and knowledge about the MidiBox platform is definitely recommended.

The original bulk order is closed. I might start another bulk order this year if there's enough demand. You can express your interest in getting PCBs by adding yourself to the list below. Note that I don't promise to start this bulk order at any specific time of year, so please don't send me PMs about that - I'll collect orders from everyone on the list and will announce the bulk order on the forum as soon as something is happening!

Username	Number of PCBs
rosch	5
modularman	4
henrikgo	1
kroutshev	2
Strophlex	10
booster	2
jooks	2
kok6	2
iorobyy	2
lead bromide	2
SexyBeast	4
stevenclements	2
Morten	2
jovius	2
unrise_lyrical	4
Tamiflu	4
fussylizard	8
LeonT	2
ampersand	2
joeribl	2
dnode	2
maniac	2
Vytantus	2
Total	70
