# WILBA'S 6582A SID MEGA SALE!!!

#### **Current status:**

**MEGA-SALE #7 is IN PROGRESS** ~442 SIDs are allocated to people on the pre-order list. People who have not replied to the request PM have been bumped to MEGA-SALE #8 which will run in January.

**MEGA-SALE #8 will happen in January** Add your pre-order to the list at the end of this page. You will be contacted by PM or email. Please put an email address in your MIDIbox forum profile as an alternate method of contacting you. If you do not reply to PM or email within two weeks, your pre-order will be ignored.

## THE GOODS

6582 (6582A) SIDs are just like 8580 SIDs and **not** like 6581 SIDs. They have the filter that works best for the MB-SID V2 Bassline mode, low noise, less bugs. Look elsewhere for whether 6582/8580 is better/worse than 6581.

I use eight of them in my MB-6582 MB-SID V2 Synth, but you already knew that.

## THE DEAL

6582 SIDs now cost **AU\$30** each plus postage and handling fees.

I add up the exact cost of SIDs and postage in Australian dollars, and then multiply by 1.0351966873706 to add the handling fee.

Postage will be calculated as the actual cost to post, plus packaging. The PayPal invoice will include the handling fee in the postage amount. Most of the time, postage will be AU\$6.15 for an airmail letter. If you are ordering more than 8 SIDs, I might choose to upgrade the postage to an insured parcel, where available.

All SIDs I sell are tested before packing to ensure the oscillators and filter work. These chips are newold-stock, not pulls from Commodore 64, and are unused when sold, with absolutely no long term guarantee. However, considering these chips have been safely tucked away in antstatic tubes for 15 years, they are *less likely to fail* than one you find in Commodore 64 that has been power cycled thousands of times and been alternately cooked and frozen in a garage etc. From my experience, after testing over **two thousand** 6582 SIDs, only 3 were found dead. After salvaging about eight 6581s, all were found to have dead filters or dead oscillators.

If you find any chips faulty through initial testing with hardware that is known to work, I might allow you to return them and get a refund or replacement if possible.

#### **MEGA-SALE #8 PRE-ORDER LIST**

People are welcome to add their username and quantity to this list, but you must register on the MIDIbox forum first
