Assembly

Decide on the configuration to be used. Any combination of switches, encoders or OLEDs is possible if they fit.

Only one encoder is wired to the J1 header. If you want to use the EN2 position, wire the legs to the empty EN1 solder points.

R9 and C29 form the power-on reset for OLEDs. R7 should not be installed. R3/C25/R4/C26 form a termination shunt for OLED data lines. They shouldn't be required.

The switches accommodate either DT6 or 6mm switches (obviously only one type!). For DT6 switches, ensure the flat side is aligned with the PCB silkscreen.

J2 can supply power if needed.

Interconnections

J1 is the SCS header, connecting to J10A

J2 can provide power as indicated; it is also connected on J5.

J5 connects to J15 on the Core (or equivalent)

Technical drawing of a rectangular floor plan with dimensions and room layouts. The overall dimensions are 120.00 (width) by 110.00 (height). The plan includes several rooms and corridors, each with a numbered circular symbol and a rectangular layout. The rooms are labeled as follows:

- Room 101: Located in the top-left corner, with a width of 30.00 and a height of 25.00.
- Room 102: Located in the top-middle, with a width of 30.00 and a height of 25.00.
- Room 103: Located in the top-right, with a width of 30.00 and a height of 25.00.
- Room 104: Located in the middle-left, with a width of 30.00 and a height of 25.00.
- Room 105: Located in the middle-middle, with a width of 30.00 and a height of 25.00.
- Room 106: Located in the middle-right, with a width of 30.00 and a height of 25.00.
- Room 107: Located in the bottom-left, with a width of 30.00 and a height of 25.00.
- Room 108: Located in the bottom-middle, with a width of 30.00 and a height of 25.00.
- Room 109: Located in the bottom-right, with a width of 30.00 and a height of 25.00.

The drawing also shows a central corridor and a small room labeled "1010" in the bottom-right corner. Dimensions are provided for the overall plan and individual rooms.
