

MBlight Mind-Machine

What's a Mind-Machine?

The Mind-Machine generates audio-visual signals that influence the frequency of a person's brain waves, thereby inducing different mental states depending on the chosen pattern.

In this project, a little modification to a MIDI box's DOUT module is presented, which allows to drive LEDs built into spectacles.

Here is a little demonstration: <http://www.youtube.com/watch?v=odRrXJm-RGQ>

Here is a detailed project description: mindmachine_diy-beschreibung.pdf

If you have questions please send an Email to We_R_1_at_web.de (Kurt).
