## **SVN Repository for MIOS8 and MIOS32** projects

MIOS8 and MIOS32 projects are stored in a SVN repository.

TODO: explain installation of SVN clients for Windows/MacOS/Linux here Optionally search for "svn" in the wiki to retrieve already existing documentation.

## Downloading projects with a SVN client with read-only access (sufficient for most users)

Use following URLs:

- MIOS8: svn://svnmios.midibox.org/mios
- MIOS32: svn://svnmios.midibox.org/mios32

## Downloading projects with a SVN client for read & write access

Ask TK for a SSH account.

Then use following URLs:

- MIOS8: svn+ssh://svn@midibox.org/mios
- MIOS32: svn+ssh://svn@midibox.org/mios

## Using the SVN Web Client to determine Firmware Changes

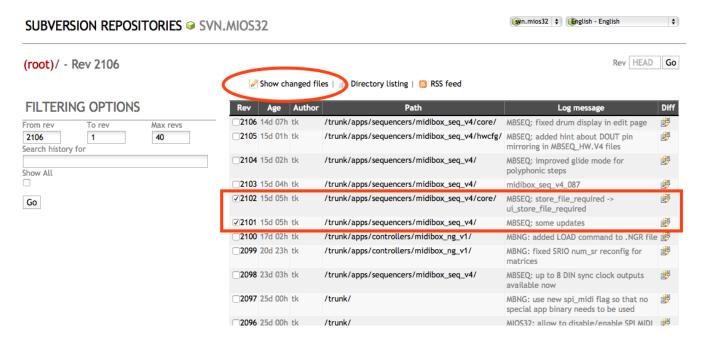

Here an usage example:

Go to http://svnmios.midibox.org

Select the MIOS32 repository, and then click on the "View logs" button.

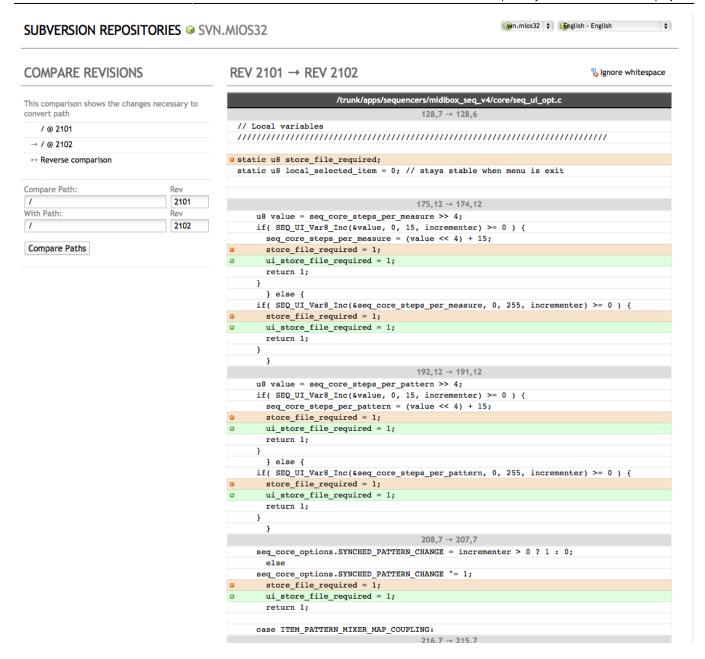

Check the comments, they are sometimes helpful. Select the potential problematic version with a "known good" one, or whatever you want to compare. Then click on the "show changed files" button:

This gives you a nice looking diff over all changes:

http://wiki.midibox.org/ Printed on 2018/03/06 19:00

I'm using this web based method as well whenever somebody reports a problem after firmware changes in order to find out what I did ©
