**Display and Menu**
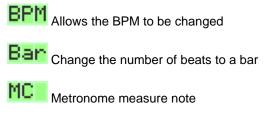

The LCD is a standard 2x20 HD44780 display.
All parameters are shown in one view.

```
C 1 B4 MC4 BC3 BPM *
B*140 P01     1: 1:   0
```
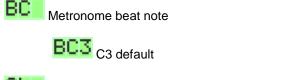

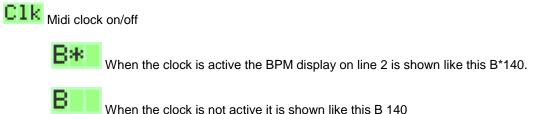

Menu navigation

The current menu position is indicated by characters 16,17 & 18 on the top line of the display. Note that in version 0_2 the default has changed to the Recall function, see below.
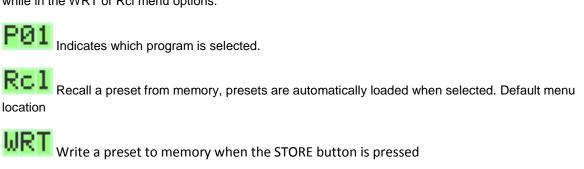

`BPM` Allows the BPM to be changed

`Bar` Change the number of beats to a bar

`MC` Metronome measure note

      `MC4` C4 default   `MCF` Metronome output disabled when MCF is displayed

`BC` Metronome beat note

      `BC3` C3 default

`Ch` Midi channel selection for the metronome output

`Clk` Midi clock on/off

    `B*` When the clock is active the BPM display on line 2 is shown like this B*140.

    `B` When the clock is not active it is shown like this B 140

Memory (Preset) navigation

32 preset locations are available for user programs. These presets can be selected using the encoder knob while in the WRT or Rcl menu options.

`P01` Indicates which program is selected.

`Rcl` Recall a preset from memory, presets are automatically loaded when selected. Default menu location

`WRT` Write a preset to memory when the STORE button is pressed

`CLR` Clear all memory locations and reset to default values when the CLEAR button is pressed
