Midiclock 2 Audio Converter, Audio 2 Midiclock Converter

4 Recording a Midiclock on a Audio-Track on your Multitrack-Recording-Device

in order to get the possibility to overdub a sequencer track on Recording Devices without Midi-Clock builtin

## Introduction

i fell in love with a zoom livetrack-l12, a multitrack-audio-recorder, in a compact design, severell submixes, parametric eqs, compressor, efx and a extra master-track-recording, and that for a good price...

but it doesnt have midi... in specially it does not have a midiclock.

so when i have to make a track new, or i want to overdub a track, a track that is Midiclock-Driven a sequencer track for example...

So with this device, i lose one Audio-Track, because i use this one Audio-Track, as a Click-Track, it records Audio-Rectangle-Pulses, which are a converted Midiclock-Pulses

when i then playback the Click-Track-Recording, it converts this Audio Pulses back to Midiclock-Messages.

Thats all, not much code, stripped down, running thight.
