

# Envelope Follower

based on Harry Bissel  
a SMD Variant, ready for Pick and Place

-shown 2 identical boards on one pcb - to save money..

## Features

- \* audio in \* Envelope out \* Gate out + Gate Threshold-Poti
- \* Full-wave rectifier
- \* 3 identical Peakdetectors which are Reseted from a "stepper"
- \* a Oscillator with tunable Frequency to drive the stepper
- \* Smoothingcap set via Jumper
- \* Debugging Jumpers
- \* PTC and Diode Polarity Protection on the Supply-side

## Hardware Requirements

- This Device i build as input module for my [CV1](#) Project, but can be used for other things too
- Soldering Iron - with a Dip that can Handle SMD-Parts, Wires, solder Paste...
- Eurorack Power Source +-12V!

## Building

The Design is optimized for Pick and Place most SMD Parts are on the Top-PCB

i ordered 5 PCBs from JLCPCB with almost all SMD Parts presoldered(except 2 SOIC chips PTC and Protection Diode)  
 now waiting for Presoldered PCBs

## Frontpanel

 **Fix Me!** - Eurorack Alu-Plate

## BOM LCSC

these are the parts which are presoldered by the Pick and Place Machine, these are “Basic” Parts  
 the values with a “x” in it, like Dx1 — are because there are 2 Identical Parts on 1 PCB, because there 2PCBs on 1PCB.... so Dx1 is the same like D1, but its position is on the second board.

V1. from 05.01.2021 [env-follower.zip](#)

Schematic, Board, Gerber, Pick and Place and Booms, ready for Pick and Place!

—at the moment untestet, since i order the project just now!

as Example what you see if you got thru the ordering process:

## Schematic

## To Do

experiment with the Smoothing CAP, i already implimented a Jumper which add a second Capacitor to “double” the capacity... i took 220+220nF, but maybe it is better to use 100+220nF?

experiment with the Frequency Pot which is a lin10K + 2K Serial Resistor which gives a range of 2K-12K - really dont know what value spectrum we need here!

adding some Jumpers to break the circuit for debugging or measurement frontplate, Debugging First Version

Just let a Private message on the forum to user already involved.

I have ProtoBoards here - i test one, and if it works, i can share them for Beta Testing-if you pay the postage
