Hello, I'm gslug (or Kevin). ~~I only recently stumbled accross MIDIbox and am now in the process of collecting parts for an MB6582. Whilst waiting for the last parts to arrive I am attempting to get to grips with Eagle and lay out a PCB for a C64 replacement PSU. My next build will probably be a Midibox CV as I have become rather addicted to collecting vintage analog gear. More to follow once I start building things.~~

Thanks to TK, Smash, Wilba and everyone else for this fantastic project

As of 11th December 2011, I have a completed MB6582 and PSU (both finished around September), though I need to get around to acquiring another 4 SIDs. I have put the Midibox CV on hold in anticipation of V2……

Current projects:

Seq V4l: Parts ordered for two. One core LPC completed.

MB909: 9090 PCBs and parts ordered.

Future plans:

Seq V4: Waiting for my place in the bulk order for the control surface PCB. I need to source a case as I seem to have missed that order:-(

Midification: Add Midi (or at least CV/Gate) to a Roland SH-1000.

x0xb0x: I was going to order a kit from Willzyx, but the 9090 order appeared and somewhat reduced my bank balance! Soon.

Modular: Long term - I need a bigger flat first!

I think that's it.
