

## MIDI ROUTER

---

[Midi Router on ucapps](#)

Type midirouter or midi router or midiro\* (for mis-spellings) [here](#) to search forum.

---

### Add links to photos!

- Please, if you decide to build a midirouter, take some photos before and after you put it in a case. Add them to a new forum topic and link<sup>1)</sup> it from here. Add any other info like what version of board was used and midirouter version etc...it helps newbies a lot.
- Also, if you are reading this and have built a midirouter that you created, it'd be cool if you take a photo too and insert a link to it from here.

<sup>1)</sup>

It's easy to insert a link, first sign in, click on the 'edit this page' button, then type 2 square open brackets, paste your url, and type 2 square closed brackets.
