We can install SDCC and GPUTILS with the Synaptic Package Manager (in Gnome can be found in the upper panel: System/Administration/Synaptic Package Manager) or entering the following commands

```
sudo apt-get install sdcc
sudo apt-get install gputils
```

..now hold on we have to set the proper environmental variables.

...in your “/etc/environment” file add these 3 lines below:

MIOS_PATH=“/home/this/mios/trunk” MIOS_BIN_PATH=“/home/this/mios/trunk/bin” MIOS_SHELL=“/bin/bash”

– geez louise! it's that easy.
