

ON this board we have 3 micromatch Connectors, which are crimped fast on a cable
 On the other side of the cable you have to solder directly to the Base-PCB,
 be carefull while soldering - and follow the schematic, which is layout for 3.5 Jack Midi Type B!

Schematic

Hardware Requirements

- [midiphy LoopA caseless Kit](#)
- Soldering Iron - with a Dip that can Handle Thruhole-Parts, solder Paste...
- The other Parts from the BOM

Building and BOM

All necessary Information is printet on the PCB, but also check the Schematic...

5x [Leiterplatten Montageblock aka Standoffs](#)

- 3x Micromatch Socket 2x5Pole 1,27mm
- 6x Micromatch Crimp Connector you need only 3, the 3+ is for fails by crimping
- 1x Flat Cable 1,27mm pitch
- 1x USB-Socket
- 8x 3,5 Audio Jack
- Round 3mm LEDs instead of Rectangle

And there will be some additional Fasting Material, like bolts, Screws, Standoffs, that i dont know right now, because the first prototype has to be built first...

Frontpanel

I made a DXF File which you can send to: (once the prototype state is gone)

[Formulor in Germany](#) - Acrylic ... 2Pieces incl shipping 42€

[frontpanels.de in germany](#) my choose

[The Beast - UK](#)

[Schaeffer-ag.de](#)

Recommend Material

3mm x 128.5 x 188.58 Aluminium, anodised

contact frontpanels: info@frontpanels.de

[frontpanels-euroloopa.zip](#) - NOT TESTET - REVERSE ENGINEERING!!!!!!

To Do

waiting for the PCBs and Panels... since the Panels are reverse - engineered - its praying for good luck!

Community users working on it
