

# LTC Module

LTC Module can be used to add Midi-thru port to Midibox, to Midi input/output activity LEDs or to connect Midibox to Computer RS232 port used as Midi a interface.

- [LTC Module](#) <sup>uCApps</sup>
- [MIDIbox-to-COM](#) <sup>uCApps</sup>

An easier way to connect to a COMM port would be to follow the “MIDIbox-to-COM” instructions, except using an [RS232 Shifter Kit](#) or the pre-assembled SMD version, [RS232 Shifter SMD](#) from SparkFun Electronics instead of the MAX232.
