

Sensors

Introduction

Here some informations about various sensor-types and how to connect them to a midibox.

Keep in mind that **most of sensors are analog , so they require an AINSER Module to be plugged as inputs to the Core Board**. If you're interested in working with sensors, you might also want to check out the [ACSensorizer-Midibox](#) project.

Sensor-Wiki maintains a free list of possible sensors you could experiment with . For example the picture above is a EEG Active Electrode from the OpenEEG Project. A mind-controlled midibox ? who said that ?
